PROFILE

Visionary fullstack developer and founder of **Reltroner Studio**, currently focused on building structured, world-scale platforms rooted in SSR architecture, CI/CD pipelines, and self-sovereign systems. Proven experience in deploying end-to-end projects including a Next.js-powered worldbuilding site and an HRM system with Laravel 12. Passionate about creating future-proof digital ecosystems with high adaptability, clarity, and purpose.

EXPERIENCE

Reltroner Studio Founder

May 2024 - Present

Reltroner Studio | Padang, Indonesia

Type: Freelance / Personal Studio

Architected and deployed multiple self-owned platforms including reltroner.com, a structured worldbuilding system using **Next.js (App Router)** and **CI/CD**. Also developed a **Laravel 12-based HRM system** with Breeze authentication and modular CRUD functionalities. Core responsibilities include system design, API integration, deployment via Vercel/Laragon, and full documentation.

EDUCATION

Bachelor's Degree (S1) in Information Systems

2027

Universitas Andalas | Padang, Indonesia
