PROFILE

Full-Stack Developer (Laravel & Next.js) | ships internal tools end-to-end; open to junior | early-mid roles.

Full-Stack Developer (Laravel & Next.js) who ships production-style internal tools end-to-end - schema → APIs → UI → deploy - with clear docs and small, frequent releases. Built a modular HRM (Laravel 12) and a Markdown-driven site (Next.js 15) with RBAC, pragmatic data models, auth, and CI/CD. Seeking a junior–early-mid role (or internship/apprenticeship) where I can own scoped features and grow under structured reviews. Location: Jakarta (open to on-site/remote). Start: immediate. English: CEFR B1 (actively upskilling; target B2 in 2025)

Location: Jakarta (open to on-site/remote). Start: immediate. Time-zone: GMT+7.

Selected Projects:

Reltroner HRM: Laravel 12, MySQL, Blade/Tailwind, Breeze, Vite

Live: hrm.reltroner.com · Code: github.com/Reltroner/reltroner-hr-app

- Shipped core HR modules: employees, roles/permissions (RBAC), tasks (with status), attendance, payroll, leave.
- Implemented auth middleware and role-based access; documented CRUD contracts and user flows.
- Added lightweight analytics (Eloquent relations) for daily operational overview; wrote setup & maintenance notes.
- Reduced edit-form mistakes by fixing date binding & adding validation messages (reported via internal QA doc).
- Cut deploy friction with Vercel CI & GitHub Actions; added setup notes so others can reproduce locally.**reltroner.com:** Next.js 15, Tailwind, Vercel (CI/CD)
- Built Markdown-driven content system (docs/wiki style) with sitemap and basic SEO meta.
- Automated deployments (Vercel) and basic CI (GitHub Actions); contributor-friendly README and structure.

EXPERIENCE

Reltroner Studio Founder
📅 **Mar 2021 - Present**

Reltroner Studio

Founder • Reltroner Studio March 2021–Present

- Owned end-to-end delivery for HRM and content platform: planning, backend/frontend, testing, deploy, docs.
- Designed database schemas and REST endpoints; debugged cross-browser issues; tracked bugs and fixes.
- Wrote user/admin guides and change logs to support maintenance and future customization.

EDUCATION

Bachelor's Degree (S1) in Information Systems
📅 **2027**

Universitas Andalas | Padang, Indonesia

B.Sc. in Information Systems (in progress), Universitas Andalas **expected 2027**

LANGUAGES

English   Working Knowledge

OTHER SKILLS & CERTIFICATIONS

- **Backend:** Laravel 12 (Breeze, Eloquent, Migrations), PHP, Node/Express.js, REST APIs, RBAC/Auth, MySQL/MariaDB, MongoDB, Eloquent & Mongoose.
- **Frontend:** Next.js 15 (App Router), React (Hooks, Context, Router), Blade, Tailwind CSS, Bootstrap 5, Vite.
- **SSR & Rendering:** Next.js SSR/SSG/ISR with static & dynamic rendering strategies; streaming-friendly React workflows.
- **CI/CD & Cloud:** GitHub Actions pipelines, Vercel & Railway deploys, automated DB migration/seeding, custom pre-deploy/start commands, basic Docker.
- **Version Control:** Git/GitHub workflow, branching, PR reviews, stashing, hard reset.
- **System Architecture:** Structured content engineering, scalable data models, and "worldbuilding" logic for complex platforms.
- **APIs & Docs:** RESTful design, OpenAPI/Swagger, Postman; documentation-first habits, issue tracking, basic testing (PHPUnit).
- **Admin Dashboards:** Mazer and custom responsive, data-driven dashboards.
- **Location Services:** Geolocation (lat/long) & Google Maps embeds for HR/tracking features.
- **Execution & Soft Skills:** Self-taught end-to-end delivery (debugging, production troubleshooting, rapid prototyping), incremental releases, feedback-friendly, detail-oriented, clear written communication.
- Indonesian (Native) · English (CEFR B1, improving with daily practice)

Certifications (Codepolitan — Online)

- Learning Authentication Concepts & Implementation in Express.js
- Basic Express.js
- Learning MongoDB
- Creating Dynamic Web Pages with Express.js & EJS
- Introduction to SASS in CSS
- Developing an HRIS System with Laravel 12
